Lesson 3 > Part 2 > A Tale of Two Hurricanes

Question: Which hurricane caused the most damage, Hurricane Florence or Hurricane Michael?

A **claim** is a statement that answers the question.

Claim:

The **evidence** is the data used to support the claim. It can be either quantitative or qualitative. Only include evidence that directly supports the claim.

The **reasoning** is the explanation of “why” and “how” the evidence supports the claim. There should be reasoning for each piece of evidence.
