4 CER Student Sheet
Lesson 4 > Turning Problems into Solutions

Question: If you had a limited amount of resources, which problem would be the priority to address?

A **claim** is a statement that answers the question. Which problem should be the priority? Provide details about the problem.

Claim:

The **evidence** is the data used to support the claim. What specific factors support your claim? Give examples when possible.

Evidence:

The **reasoning** is the explanation of "why" and "how" the evidence supports the claim. There should be reasoning for each piece of evidence.

Reasoning:

Describe your ideas for a **solution** to this important problem. Explain how the solution will address the problem and how it would benefit the people who live in your community. You may also include a drawing of your ideas.

Solution(s):
