

LA SAFE Adaptation Student Sheet

Lesson 6 > Part 2 > Adapting for the Future

Officials analyze multiple community factors when developing adaptation plans. Thinking of your community and their environmental problems, answer questions 1-3.

1. If you were able to invest in a transportation project, which project would you most like to see funded?

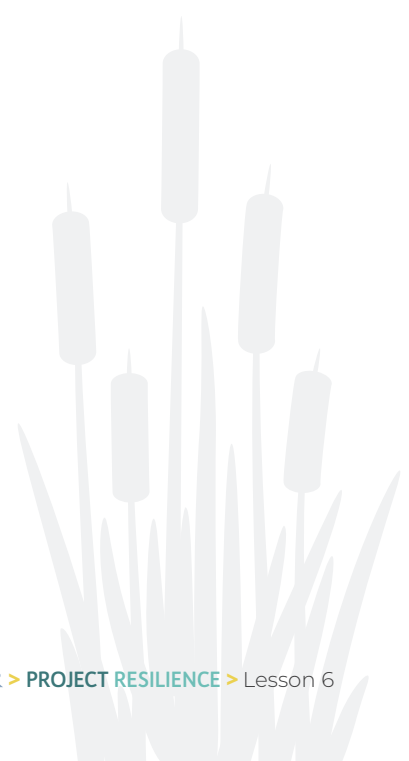

- Better bus system
- Train station
- Bike trails
- Park-and-ride
- Complete streets (sidewalks, more shade, bike lanes)

2. What is the most important action the parish should take to improve stormwater management?

- Invest in pumping and lift stations
- Slow down new development
- Require new development to retain more stormwater
- Invest in and incentivize green infrastructure (rain gardens, green roofs, planted ditches, etc.)
- Other

3. What is the most important issue your parish faces going into the future?

- Improving education
- Job opportunities
- Access to recreational facilities
- More commercial and retail options
- Healthy and safe environments
- Other

LA SAFE Adaptation Student Sheet

Lesson 6 > Part 2 > Adapting for the Future

For questions 4 and 5, please rank the options you would like to see implemented in your community from 1-10, with 1 being the most attractive option and 10 being the least attractive option.

	1	2	3	4	5	6	7	8	9	10	
Most attractive	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Least attractive

4. Culture & Recreation

- Support Culturally-Focused Camps & Afterschool Programs
- Community Gardens & Planting Programs
- Community Gathering & Market Spaces
- Playgrounds that teach about living with water
- Public Boat Launches
- Hike & Bike Nature Trails
- Healthy-Living Programs & Activities
- Summer Camps Restoration Programs
- Attract Recreational & Entertainment Establishments
- Public Recreation & Sports Facilities

5. Stormwater Management & Greenspace

- Cross-Parish Stormwater Management Strategy
- Improved Parish Drainage System
- Culvert/Ditch Maintenance
- Create a Full-Time Drain Maintenance Department
- Dredge Canals, Drains, & Culverts
- Pervious Paving
- Incentivize Green Streets
- Programs for Citizens to Assist with Canal Maintenance & Tree Planting
- Wetland Walking Trail
- Plant Cypress Trees to Break Up Storm Surge
