## Estuary Model Metaphor - Student Sheet

Lesson 2 > Part 2 > A Focus on Estuaries

Each part of your stream table model represents a part of an actual estuary system. Fill in the table to create metaphor statements that explain why the parts of the model are like their counterparts in the real world. The first statement has been done for you.

PART OF THE MODEL		PART OF THE REAL WORLD		WHY ARE THEY ALIKE?
<i>The water</i>	is like	<i>the Mississippi River</i>	because	<i>it carries sediment down to the "ocean," which creates new land.</i>
