

Exploring the Dynamic Nature of the Sun

Student Page

Name _____
Date _____ Class _____

Write the number of your Sun image here: _____

Compare and contrast the images on your *Sun Image Card*.

Describe the similarities and differences between images using the chart below.

How are the images similar?	How are the images different?

Answer the questions below:

1. How do your images of the Sun look different from how the Sun usually looks to you? Be specific.
2. Is there a pattern to the images on your card? Explain.
3. What new knowledge or understanding of the Sun do you have from working with these images? Explain your answer.
4. Do the images 1) show the Sun change over time, 2) show a change in the scale (pictures taken close up or far away), or 3) show that they were made with different instruments (that make the Sun look different). Use evidence to explain your answer.
